

Building Excellence

AIC INFRASTRUCTURES PVT. LTD.

Aviation Infrastructure Company

Reg. No.: RI91/10506

OUR SERVICES

- ① CONSTRUCTION OF AIRPORT RUNWAYS AND TAXIWAYS
- ② CONSTRUCTION OF HIGHWAYS
- ③ CONSTRUCTION OF METRO RAILWAY STATIONS
- ④ CONSTRUCTION OF METRO RAIL DEPOT
- ⑤ CONSTRUCTION OF BRIDGES AND FLYOVERS
- ⑥ CONSTRUCTION OF SPORTS COMPLEX

MANUFACTURING FACILITIES

Building Excellence

AIC INFRASTRUCTURES PVT. LTD.

AIC INFRASTRUCTURES PVT. LTD.

“Building Excellence with an enviable record of over 40 years of experience”

An aviation infrastructure company, orchestrating projects with consistent quality and safety assurances and adherence to planned projects timelines with infusion of latest Machineries and Technologies.

KEY STRENGTHS

AIC Infrastructures Pvt Limited has been in the business of pavement constructions, repairs and restorations with specific focus on Runways, Highways and Roads. AIC has executed various projects in India, which are orchestrated with consistent quality & safety assurance and adherence to planned projects schedule.

AIC Infrastructures Pvt Limited has also partnered with the US based company for application of their revolutionary product on Runways, Taxiways and Apron Surfaces. This technology is called Airport Grade Steel Guard (AGSG). Our Goal is to protect the pavement across the globe.

AIC Infrastructures Pvt Limited is also the sole representative for GATIC in India, Nepal and Bangladesh. GATIC is an UK based Alumasc Group Company listed on the London stock exchange and we provide heavy duty, below ground access solutions and high capacity surface drainage solutions for Airports, Ports and other Infrastructures.

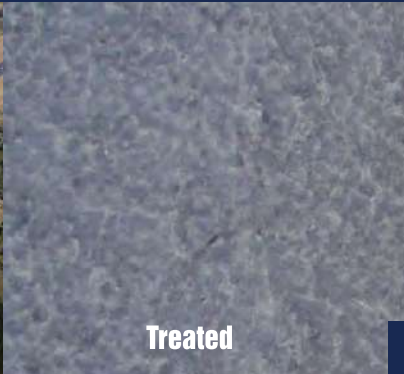

SURFACE 2009

AFTER APPLICATION

AGSG AIRPORT GRADE STEEL GUARD

Treated

AFTER TWO YEARS

Untreated

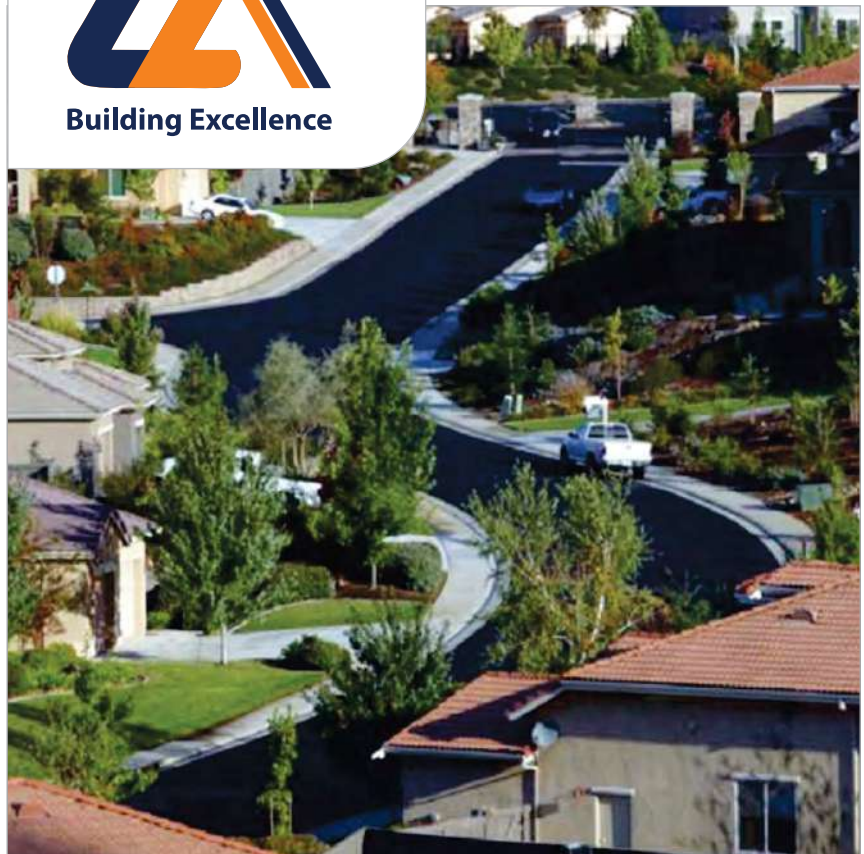

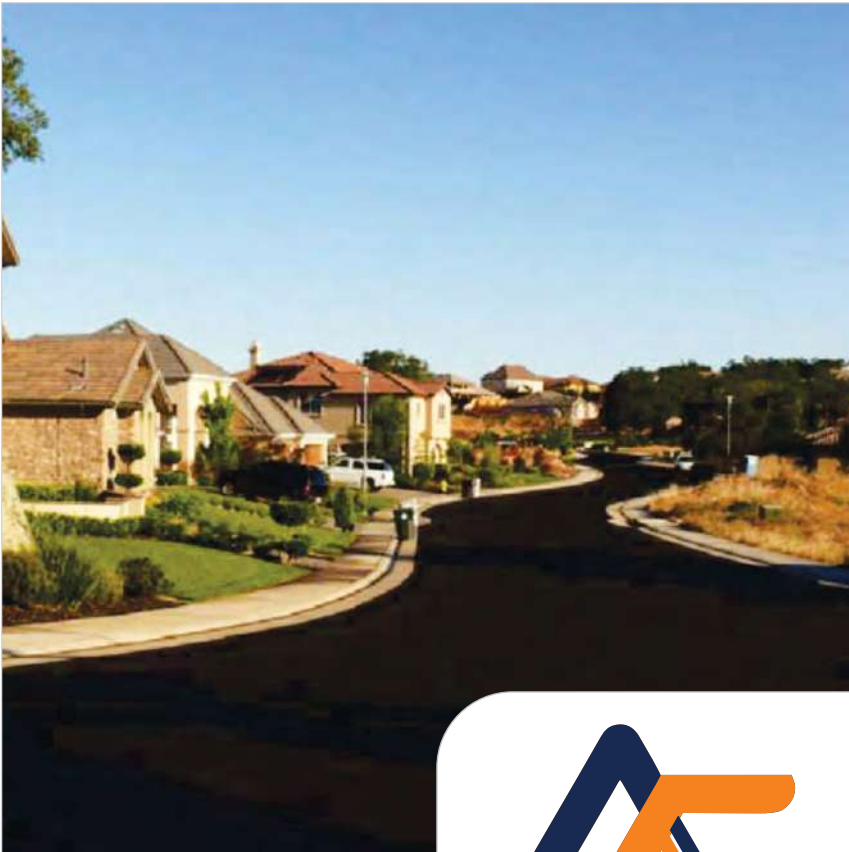

Airport Grade Steel Guard (AGSG) is an asphalt protective coat application designed to preserve and extend the life of existing asphalt surfaces. AGSG has been used on runways, taxiways and apron surfaces at many airports throughout the world.

AGSG has high adhesive characteristics, which when combined with polymer modifiers and varied quantities of solids to suit the condition of individual airport pavements. AGSG seals the surface by thus eliminating the FOD generation and reduces the deterioration rate of asphalt based pavements.

Similar solution is available for preservation of Road & Highways.

Airport Grade Steel Guard (AGSG) is a non-toxic and cost effective treatment that provides a weather-proof coat to extend the life of existing pavement and prevent its deterioration in a highly advanced way.

STEELGUARD-ROAD

THE FUTURE IS MICROSURFACING

ROADSAVER II
RAYNER EQUIPMENT SYSTEMS™ · USA

- ✓ Heavy Duty Engine
- ✓ Electric over Hydraulic Control System
- ✓ Liquid Additive System
- ✓ Quality control System/Computerised Display
- ✓ Twin Drive/Twin Shaft Pugmill
- ✓ T1 Steel
- ✓ Dry Additive System
- ✓ Operator control System
- ✓ Traction Master Conveyor System
- ✓ Control Area Network (CAN) controls
- ✓ Vibrator System
- ✓ Heated Emulsion pump
- ✓ Pavement water/fog spray system and many more

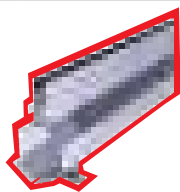

THE ROAD TO OPPORTUNITY

- ✓ **RELENTLESS RELIABILITY**
- ✓ **OPERATOR FRIENDLY**
- ✓ **OPTIMIZED SYSTEM**

“PAVE WITH ROADSAYER II”

GAS AIR TIGHT INSPECTION COVERS “GATIC” and RAIN TO DRAIN SOLUTIONS

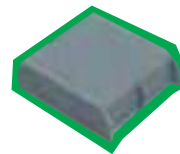

**Gatic
Slotdrain Channel**

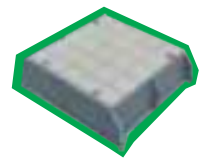

**Underground
Pipework**

**Collection and
Access Boxes**

**Gatic Solid-Top
Inspection Cover**

**Gatic Recessed
Inspection Cover**

Engineered for: -

- ✔ Airports and Sea Ports
- ✔ Utilities – Gas and Electricity
- ✔ Water - Sewerage Treatment Works / Water Treatment Works / Pumping Stations
- ✔ Highways / Tunnels
- ✔ Power Stations / Sub-Stations
